**10:15 - Coffe Break**

**10:30 – 12:30 - Workshops Paralelos**

Workshop (A) - Prof. Dr. Inmaculá García Martínez (Universidade de Granada)  
Título - Barreiras de aprendizagem e inclusão  
Workshop (B) - Prof. Dr. José Luis Ubago (Universidade de Granada)  
Título - Intervalos ativos na sala de aula

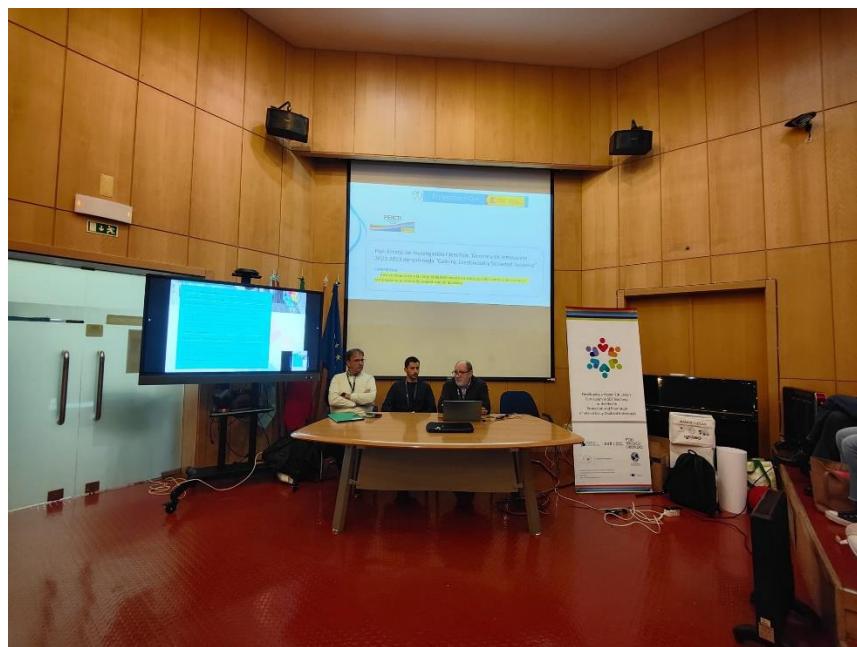

**13:30 - Encerramento**

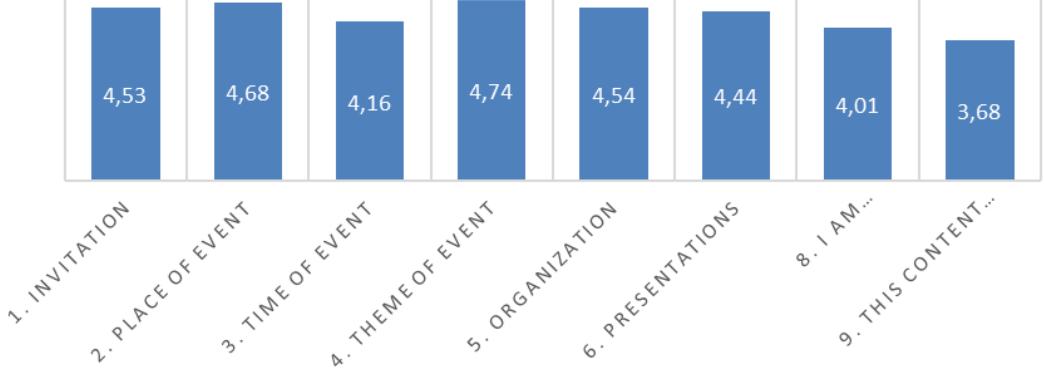

**Project THID**  
Developing a Higher Education Curriculum in SET Teaching for the Health Protection and Promotion of Intellectually Disabled Individuals  
2022-1-TR01-KA220-HED-000085572

<b>Resume:</b>	<p>The dissemination event for the Erasmus+ project THID, which brought together around 90 students from the Polytechnics of Guarda, Castelo Branco, and Viseu, as well as 8 international teachers from universities in Seville, Granada, Almeria, and Navarra (Spain), was focused on the promotion of the project's goals.</p> <p>The THID project aims to develop a higher education curriculum in Special Education Teaching (SET) for the health protection and promotion of individuals with intellectual disabilities (ID).</p> <p>The project addresses several critical issues:</p> <ul style="list-style-type: none"> <li>• Health Status of Individuals with ID: It highlights the need to improve health literacy and protective measures against risky behaviours in individuals with ID. This group tends to exhibit behaviours such as smoking, low physical activity, and obesity at higher rates than their peers without disabilities.</li> <li>• Impact of COVID-19: The pandemic has exacerbated the challenges faced by individuals with ID, especially in accessing health services and participating in formal education.</li> <li>• Curriculum Development: The project innovates in curriculum development that includes multiple tools and resources like coursebooks, teacher guides, assessment tools, lesson plans, and e-learning modules. This curriculum is designed to enhance</li> </ul>
----------------	---

	<p>the competence of teacher candidates in health education and promotion for individuals with ID.</p> <ul style="list-style-type: none"><li>• Target Groups: The leading target group includes SET in partner countries, academicians, special education teachers, and stakeholders working in health protection and promotion.</li><li>• Dissemination and Collaboration: The project emphasises dissemination activities and collaborative efforts among partners to effectively reach a wider audience and implement the curriculum.</li></ul> <p>This event, therefore, served as an essential platform for sharing knowledge, strategies, and collaborative efforts towards improving the health and education of individuals with intellectual disabilities, aligning with the broader goals of the THID project.</p>
